MANY CASH THEIR SAVINGS STAMPS

But the Practice is Much Less Frequent Now Than Formerly.

Approximately \$2,500 worth of War Savings stamps have been redeemed in Marion county since the stamps were first put on sale. All of these have been redeemed at the local post office.

The local office furnishes all other offices in Marion county with stamps with the exception of the Mannington office. Just as soon as any stamps are redeemed, the redemption of same must be reported to the Fairmont office. As yet the local office has not received a report of a single dollar's worth of stamps being redeemed outside of Fairmont.

Most of the stamps that have been redeemed were cashed shortly after the Christmas holidays. In several of the factories, stamps were given to the employees for Christmas gifts, and they were cashed shortly afterwards. The authorities at the local office report a marked decrease in the number of stamps that are being cashed. During the month of February only \$209 worth of the stamps were cashed.

ASSIGNED CARS

(Continued from Page One.)

steel mills which produce nearly 100 per cent war supplies.

Mr. Patton, who has been active in every endeavor to secure the transportation questions which detract from the national prosperity of this region, touches on railroad fuel the lethargy of the B. & O. and the praiseworthy efforts of coal operators to keep their organization intact in this statement as follows:

Car assignment for railroad fuel have worked havoc in the fields; incomplete reports for the two months indicate that about 80 per cent of the entire production has been applied for railroad use and practically all of this fuel was the high volatile coal so badly needed for the operation of mills and which fuel should have been applied for that use and the railroads confined to steam coal, which would supply their needs equally as well. The mines with important war orders, as well as mines with free coal have not been permitted to ship until the car assignments for fuel are taken care of, and inasmuch as these assignments amount to more than six hundred cars daily with an average daily car supply of less than that number, the inevitable result has been day after day of idleness.

Patton appeals to the Baltimore and Ohio railroad officials to relieve the situation by adjusting the regional shortage have not produced results. The attention of the Director General has been called to the matter with request that immediate action be taken for the good of the community and the county at large.

The fuel administration has been requested to rectify the indiscriminate handling of railroad fuel and the conserving of the high grade coal for purposes for which its use is indispensable. In the meantime the mine operators are strenuously endeavoring to keep their organization intact to handle their product to railroad cars when the situation is cleared away and coal car equipment is available for their use.

Strange, Mysterious Power Possessed From Birth By This Wonderful

CLAIRVOYANT PROF. MARTIN

America's Foremost Palmist and Psychic Medium

The science of Palmistry is as old as the writings of sacred history. Through its wonderful revelations a master of the science is enabled positively to tell you

Low Fee \$1

to all who bring this advertisement.

You Cannot Afford to Make a Mistake

in your love affair in choosing life's right partner; neither can you afford to go wrong in business or any transaction of a business nature, therefore you should consult Prof. Martin at once, and be advised accurately and wisely.

CONSULTATION AND READING ABSOLUTELY FREE.

If you fail to be satisfied with what Prof. Martin tells you, and if he does not tell you the object of your visit, your present business, and the important things you wish to know, he will positively refuse to accept any fee for his time or his reading. You pay nothing in advance. If you are a failure—a non success—let me help you. Let me make you successful by having me strengthen your personality, by letting me develop your personal magnetism. This I can do both quickly and reasonably. Others succeed! You fail—why? Others succeed in their numerous undertakings large and small in life because they have personality, because they have personal magnetism, and because they know how to use it. They, in reality, attract success unto themselves. The person without personality—the non-magnetic person—repels success; such a person (man or woman) cannot attract success, true love or true friendship. Once you have a strong personality—you will assert more force of character, more individuality; once you have ample personal magnetism your power of attraction will be greater—you will be enabled to attract success to yourself, to your immediate sphere—and even happiness and the object of your heart's desire will be within your magnetic reach.
